

We place silla in the forefront of Europe.

Europe is an opportunity for all the residents of Silla that allows us develop innovative projects that improve the town and the life of citizenship.

It's an opportunity to learn, share, gain knowledge and be inspired by social politics and projects being developed in other countries.

The Hug to Employment, is the first project led by the City Council of Silla through of the Department of European Projects and received in 2020 the prize of the Spanish Federation of Municipalities and Provinces in the category of Prevention and intervention against absenteeism school in municipalities.

It is a hug to the youth occupation, a comprehensive program of socio-labour insertion of the young people from the education and promotion of their talent that aims to help youth discover and assert your talent, their vital project and their place in society through the coaching.

Youth is the future, for this reason we must place young people in the middle of our policies and work to combat school dropout from education and training. It's time to share experiences and dialogue to ensure that our young people have access to the labor market and actively participate in society.

Throughout this guide we will analyze the Hug methodology, which integrates in the knowledge acquired from our partners Holland and Norway and values our practices, following the path marked out by the European Union and its strategy. We have started the road, it is necessary that we continue to make this journey all together, contributing each of us our knowledge, to make Silla an innovative town among all and pioneer in the field of youth, education and work: LET'S PLACE YOUNG PEOPLE IN THE MIDDLE, LET'S CREATE A MECHANISM OF WORK AND COOPERATION BETWEEN ALL THE AGENTS INVOLVED AND THE DIFFERENT ADMINISTRATIONS, in order to improve their level education and reduce school failure and dropout as the only way to achieve integration socio-labour.

Let's place Silla in the Forefront of Europe.

Vicente Zaragoza Alberola.
